FOR IMMEDIATE RELEASE

## **SUPERIOR AIR HANDLING RELOCATES MANUFACTURING PLANT**

**Clearfield, UT (June 17, 2013)** – Superior Air Handling, a division of Harris Companies, today announced that they will move their manufacturing operations to Zumbrota MN. All Engineering, Sales, Administrative, and Accounting operations will remain in Utah.

Superior Air Handling, founded in 1948 in Ogden, has operated a manufacturing facility in Utah for more than 65 years and is presently located at the Freeport Center in Clearfield UT. The move allows Superior to achieve greater economies of scale by combining Superior's manufacturing operations with that of another division of Harris Companies. The newer modern facility is a LEED Silver facility with state of the art ductwork manufacturing and piping pre-fabrication capabilities for HVAC projects. In addition the facility will house the manufacturing of nuclear grade components which are currently only produced at the Clearfield facility, for Superior's Energy and Environmental Division.

Company President, Randy Richter said "We appreciate the loyal and dedicated service of our employees at the Clearfield facility and our longstanding relationship with Sheet Metal Worker's International Union Local 312. Regardless of the moving of our manufacturing process, we intend to continue our relationship with Local 312 by continuing to grow our Building Information Modeling (BIM) Services group to serve our own projects and others in the construction industry."

### **Superior Air Handling**

Dedicated to Sustainable and Lean Construction and Lean Manufacturing processes, Superior is one of the largest HVAC Sheet Metal Contractors in the Nation, currently ranked No. 4 nationally by the Engineering News Record. With offices in Clearfield, UT and San Francisco,
